Akshay Verma

Java Full Stack Developer

Kolkata, India | +917979886622 | akshay.kverma14@gmail.com

Professional Summary

Java Full Stack Developer with 11+ years of experience in Java and J2EE technologies, specializing in full stack development, event-driven microservices, DevOps practices, and collaborative project execution. Experienced with Apache Kafka and messaging queues for asynchronous, scalable integrations. Proven ability to deliver high-quality software solutions that meet business needs, using AI-assisted tools such as Claude, Windsurf, Devin, GitHub Copilot, and Codex for rapid end-to-end development.

Technical Skills

- **Languages and Frameworks:** Java, J2EE, Spring MVC, Spring Boot, Spring Data JPA, Angular (6 to 17)
- **Architecture:** Microservices, Event-Driven Architecture, Web Services, REST APIs
- **Messaging and Streaming:** Apache Kafka, Messaging Queues
- **DevOps and Tools:** Docker, Jenkins, Kubernetes, Git, Maven
- **Databases:** MySQL, Oracle 11g
- **Methodologies:** Agile
- **AI-Assisted Development:** Claude, Windsurf, Devin, GitHub Copilot, OpenAI Codex

Professional Experience

Senior Specialist | LTIMindtree, Kolkata (Aug 2023 - Present)

- Spearheaded full stack development initiatives, improving project delivery timelines.
- Collaborated with business teams to gather requirements and align solutions with strategic goals.
- Optimized software development processes by implementing DevOps practices.
- Developed a user-friendly UI portal using Angular 17, improving user engagement.
- Built asynchronous, event-driven service integrations using Apache Kafka and messaging queues.
- Created and published Docker images, streamlining the deployment process.

- Leveraged AI coding tools (Claude, Windsurf, Devin, GitHub Copilot, and Codex) to accelerate end-to-end development, from code generation and testing to documentation and deployment.

Senior Technical Associate | Evoke Technologies, Hyderabad (Mar 2018 - Aug 2023)

- Led full stack development projects, significantly improving client satisfaction.
- Implemented DevOps methodologies, enhancing deployment efficiency.
- Developed the model layer using JpaRepository in Spring Data JPA, boosting application performance.
- Collaborated with cross-functional teams to deliver high-quality software solutions.
- Created and published Docker images, facilitating smooth application deployment.

Software Engineer | Pyro Telecom Solutions Pvt. Ltd., Hyderabad (Mar 2015 - Feb 2018)

- Contributed to the analysis, design, coding, and testing of applications, ensuring high-quality deliverables.
- Integrated APIs and services, enhancing application functionality.
- Identified and resolved issues proactively, demonstrating strong problem-solving skills.
- Ensured timely project delivery while maintaining high client satisfaction.

Education

- PG-DAC, CDAC, Hyderabad - 63%
- B.Tech, CIITM, Jaipur (Rajasthan Technical University, Kota) - 67.67%

Core Competencies

Communication, Analytical Thinking, Problem-Solving, Leadership, Agile Methodology, Team Collaboration
